THE ULTIMATE FLUID HANDLING SPECIALISTS

PAMS

Petroleum, Aviation & Mining Supplies

QUALITY YOU CAN TRUST,
SERVICE YOU CAN COUNT ON!

WESTERN AUSTRALIA'S PREMIER FLUID TRANSFER EQUIPMENT SUPPLIER

As WA's leading fluid handling equipment supplier, PAMS is recognised for delivering dependable solutions, quality products and responsive service across a broad range of industries. With deep technical expertise, a strong inventory position and representation of leading global manufacturers, we support customers with reliable equipment suited to demanding operational environments. Our commitment to service, product integrity and industry knowledge ensures we remain a trusted partner for fluid handling requirements throughout Western Australia.

PAMS has excellent vendor relationships and technology partners supporting quality, value-add solutions and innovation. We are committed to providing innovative solutions with minimum delivery time, cost effectiveness, superior functionality, safety and reduced environmental impact.

OUR VISION
To be a market leader in safe, quality, cost competitive and timely product solutions to the fluid transfer market.
To achieve sustainable growth through the quality of our people and the strength of our relationships.
To provide professional service, reliability and quality products to all key stakeholders in our industry.

WHAT WE STAND FOR
Integrity - We uphold the highest standards of honesty and transparency in all our dealings.
Commitment - We are dedicated to delivering excellence and continuously improving our services.
Quality - We strive for excellence in everything we do, ensuring the highest level of quality in our products and services.

Taking the
ONE STOP SHOP
to the next level

NO PROBLEMS, ONLY SOLUTIONS!

PAMS is a privately owned Western Australian company, established in Perth in 1987, with a proven history of supplying integrated transfer and handling solutions for industrial environments. Serving the petroleum, aviation, mining, chemical, industrial, agricultural and oil & gas sectors, PAMS brings together technical expertise and practical industry experience to deliver fluid control solutions tailored to specific operational requirements. With an inventory of approximately 10,000 line items, we are well positioned to support a wide range of applications while maintaining reliability, responsiveness and continuity of supply.

We represent a portfolio of quality manufacturers and globally recognised brands, providing access to proven equipment and components designed for performance, reliability and application suitability. Our dedicated team, with an average of 10 years' industry experience, works closely with customers to deliver informed technical support and practical solutions aligned to operational requirements. Through disciplined stock management, strong supplier relationships and a commitment to representing only reputable manufacturers, PAMS continues to provide dependable supply support to industries where quality, consistency and service matter.

COMPREHENSIVE RANGE

PAMS offers a comprehensive range of fluid handling products designed to meet the practical demands of the Western Australian market. Our inventory has been carefully developed to support the industries and operating conditions that define the region, with a strong focus on availability, suitability and performance across a broad spectrum of applications. By maintaining stock aligned to customer requirements and market demand, we are able to support projects and operations with greater responsiveness and continuity of supply.

Through close attention to local industry needs, PAMS has built an inventory that reflects the realities of Western Australian operations, including the requirement for reliable equipment, durable components and proven brands. This tailored approach ensures our customers have access to the right products when they need them, backed by the technical expertise and service capability required to support efficient and dependable operation.

KEY CAPABILITY SHOWCASE

LOADING ARMS

An extensive range of loading arms to meet all of your bulk loading and unloading requirements. Whether the application involves loading terminals, self bunded tanks, tank trucks, railcars or other skids and you are transferring hazardous or corrosive chemicals, **Liquip** is the best industry loading arm to choose.

HOSE REELS

Our range of hose reels promote safe, efficient and reliable fluid transfer across a variety of industrial applications. Designed for durability & ease of operation, they suit demanding environments and are available in multiple configurations to accommodate different hose types, pressures and installation requirements.

FILTER HOUSINGS

Designed to maintain fluid integrity and protect critical equipment. Engineered to deliver reliable contaminant removal, support system performance, operational efficiency and equipment longevity. With products suited to varying flow rates, pressures and media types, solutions are tailored to specific application requirements.

TRUSTED QUALITY NAMES

PAMS represents a comprehensive portfolio of quality brands, selected for their proven durability, technical performance and long-standing reputation in the market. We are selective in the manufacturers we distribute, choosing only established international brands that are recognised for reliability, consistency and suitability in demanding industrial applications. This disciplined approach ensures our customers have access to trusted products that meet the expectations of modern operations while supporting dependable performance over the long term.

Through strong supplier relationships and a focus on quality over quantity, PAMS continues to deliver a product range that reflects the standards of the industries we serve. Our commitment to distributing only reputable, durable and well-known brands underpins our reputation as a dependable partner for fluid handling and related industrial supply requirements.

LIQUIP

Prominent Australian company and global brand specialising in the design, manufacture and distribution of equipment for the safe handling, transfer and storage of bulk liquids, petrochemicals, and hazardous materials. Operating for over 55 years, they provide high-quality components and solutions for road tankers, fuel terminals and aviation refuelling.

OPW a DOVER company

OPW (part of Dover Corporation) is a leading global manufacturer of fluid-handling and fuelling systems headquartered in the USA. They provide critical components for safe loading, transfer and dispensing of hazardous chemicals, fuels and clean energy (hydrogen/LNG)

Ebsray

An Australian-based manufacturer of positive displacement rotary vane and highly-efficient internal gear pumps for a wide range of industrial applications. Founded in the 1920s and part of PSG (a Dover company), they proudly provide high-quality pumping solutions for viscous, aggressive or flammable liquids at high or low temperatures.

OUR BRANDS

BANLAW
Fluid Asset Intelligence

Australian-based global leader in "Fluid Asset Intelligence," designing and manufacturing premium systems for managing, transferring and securing hydrocarbons and high-value liquids. They specialise in safe refueling hardware, fuel management systems and tank overfill protection, serving heavy industries like mining, rail and construction.

ELAFLEX

The Australian subsidiary of ELAFLEX HIBY in Germany, serving the Pacific region with specialised refuelling equipment, hoses and dry-disconnect couplings. Based in Sydney, they supply safe, high-quality products for the petroleum, LPG, and chemical industries, featuring products like ZVA nozzles and ERV expansion joints.

GRACO

A leading American manufacturer of premium fluid handling systems and components, founded in 1926 and headquartered in Minneapolis, Minnesota. They design, manufacture and market equipment for moving, measuring, mixing, controlling and spraying fluids and coatings across industrial, commercial and construction applications.

PALL

A leading global supplier of filtration, separation and purification technologies, founded by Dr David Pall in 1946. A subsidiary of Danaher Corporation, they serve industries like life sciences, aerospace and semiconductors to manage fluid, maximise production and meet environmental standards.

macnaught

A 100% Australian-owned manufacturer based in Sydney, established in 1948, specialising in high-quality lubrication and fluid transfer equipment. They are recognised for producing durable, innovative products like grease guns, pumps, hose reels and flow meters for the agricultural, industrial, mining and automotive industries.

TOTAL CONTROL SYSTEMS
The Standard of Measurement

A US-based manufacturer specialising in high-accuracy positive displacement flow meters, electronic registers and accessories for measuring liquids. Serving industries like aviation, petroleum, and agriculture, they provide reliable custody transfer solutions to measure fuel, oil and chemicals.

YOUR TRUSTED INDUSTRY PARTNER

PAMS is committed to delivering confidence in every solution through quality products, technical expertise and dependable service. Our legacy of successfully completed projects over more than 40 years is the best demonstration of our capabilities. We have a truly diverse portfolio which showcases our expertise and experience.

PAMS is supported by a highly experienced team, ensuring accurate order processing and efficient fulfilment. Same-day despatch is available for stocked items ordered before midday, enabling responsive supply to meet operational demands. With established logistics capabilities, PAMS services both national and international customers with reliable product delivery.

PAMS recognises that a responsive and high-quality service offering is essential in today's business environment. We are committed to delivering the highest standard of professional service to our customers.

PAMS operates with agility and a strong customer focus, ensuring prompt turnaround of enquiries. We are experienced in sourcing specialised products and delivering solutions for unique requirements.

PAMS has maintained major infrastructure projects with a proven track record of meeting critical delivery timelines. A dedicated project management team ensures efficient coordination and seamless execution, supported by ongoing technical assistance, consistent availability of stock and spare parts and specialist maintenance and service capabilities.

We are well equipped to manage all our customers requirements with a facility over 1000m^2, which includes offices, a well stocked warehouse and storage space, further demonstrating PAMS' commitment to our customers.

PAMS maintains all required statutory insurances, including Public and Products Liability and Motor Insurance. Certificates of Currency are available upon request.

CUSTOMERS

VALUED CLIENTS

PAMS services a broad and diverse clientele across a wide range of sectors, including petroleum, aviation, mining, chemical, industrial, agricultural and oil & gas. As a long-established supplier in the market, we have built strong relationships with customers who depend on us for reliable access to quality equipment, technical support and responsive service. Our ability to understand the operational demands of different industries has enabled us to develop a customer base that values consistency, product integrity and the assurance that every requirement will be handled with professionalism.

Over time, our customers have come to place a high level of trust in PAMS as a dependable supply partner. This trust has been earned through our commitment to maintaining strong inventory levels, representing reputable manufacturers and delivering solutions that meet both immediate and long-term operational needs. By combining industry knowledge with a practical, service-driven approach, PAMS continues to support customers with the confidence that the equipment they receive is fit for purpose, sourced from trusted brands and backed by a team committed to their success.

> Our people are the foundation of PAMS and a key point of difference. Our team, together with our trusted suppliers and partners, forms the core of our business. It is through their collective expertise, capability and commitment that PAMS has built its reputation for quality, reliability and service excellence.
>
> VICTOR BENJAMIN

PAMS is proud to supply a number of Western Australia's leading resource, energy and industrial operators, supporting some of the most demanding operating environments in the state. Our client base includes major organisations across mining, petroleum and heavy industry, where reliability, technical capability and responsive service are essential. Through strong industry relationships, trusted product representation and a commitment to consistent performance, PAMS has established itself as a dependable supply partner to some of WA's most prominent operations.

THE ENERGY TRANSITION

Supporting the transition: Reliability in Petroleum, Innovation in Renewables

The petroleum industry is entering a period defined by dual pressures: continued demand for reliable energy supply and a stronger focus on efficiency, resilience and emissions performance. In this environment, operators are looking for suppliers who can support critical infrastructure with dependable products, technical confidence and continuity of supply.

At the same time, renewable technology is advancing rapidly, with major growth expected in solar PV, grid-scale storage, hydrogen and other enabling technologies that support a lower-carbon energy system.

PAMS is meeting this challenge through a broad and carefully selected product range, strong inventory depth and a clear commitment to technical service.

With product categories that include clean energy and fluid transfer equipment, PAMS is positioned to support both established petroleum operations and the evolving requirements of cleaner, more efficient industrial applications.

Powering today, enabling tomorrow!
