

PAMS

Petroleum, Aviation & Mining Supplies

**HELPING YOU TO EXECUTE
YOUR PROJECT
ON TIME AND WITHIN BUDGET**

Whether you are looking for individual components or the design, build and commissioning of a complete transfer system, PAMS has the expertise and experience required.

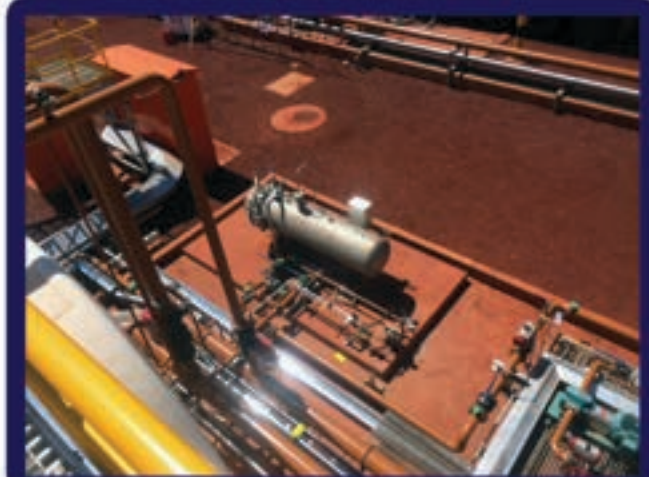

For over twenty five years PAMS has designed, manufactured and serviced equipment used for the transfer and storage of hazardous liquids.

Beginning with such basic bread and butter components as camlocks and nozzles, PAMS has become a major supplier to the petroleum and chemical manufacturing and distribution industries.

PAMS can also arrange 3D computer drafting, onsite installation, commissioning, training and servicing assistance for all mechanical, electrical, instrumentation, control and communications equipment supplied.

With PAMS' many years of experience gained in working with end users, consulting engineers, installation contractors, regulatory authorities and transportation contractors, the design, build, installation, commissioning and operation processes can be carried out so that all stakeholders are satisfied through every step of the project.

PAMS' in-house procedures ensure the appropriate quality control design and manufacturing procedures are applied to both individual components and complete turnkey liquid transfer systems.

QUALITY. INNOVATION. PERFORMANCE. AUSTRALIA-WIDE.

YOUR FLUID TRANSFER SPECIALISTS

Every hazardous liquid transfer application is unique and as such, require an understanding of a large number of issues relating to safety, performance, operability and serviceability. The success of new or upgraded liquid transfer equipment in both greenfield and brownfield sites is dependent on understanding these issues and the integration into the project objectives. The customer's industry, and any relevant regulatory authority's specifications are taken into account to providing a solution satisfactory to all stake holders.

PAMS has built a reputation based on performance and service excellence with an unwavering commitment to customer service, excellence in equipment presentation and the highest standards in safety. Our team have deep and extensive knowledge across a broad range of projects large and small, with years of experience across all industries.

We pride ourselves in providing equipment and customer support to the highest standards safely, whilst offering cost effective products and related services.

About Us

PAMS was established in Perth, Western Australia in 1987 to provide clients with boutique independent project equipment for the safe, efficient and effective transfer of bulk liquids. We will work with you in a seamless manner to produce high quality results. For further information regarding our corporate profile and professional services please contact us directly.

Why work with us?
