**FLUID TRANSFER,  
HANDLING &  
CONTROL SOLUTIONS**

**BUILT ON EXPERIENCE.**  
**DELIVERED WITH CONFIDENCE.**

## COMPANY EXPERIENCE

PAMS has been established in Western Australia since **1987** and has almost four decades of experience supplying specialist fluid transfer, handling and control equipment to the petroleum, mining, aviation, industrial and related sectors.

Throughout this time, we have continuously supplied equipment and technical solutions to major mining, petroleum and fuel companies across Western Australia. Our long-standing customer relationships are built on consistent product quality, dependable supply, technical knowledge and responsive service.

Our experience covers the supply of individual components through to specialised equipment and complete fluid transfer and handling solutions. We have developed extensive knowledge of the operational requirements of mining sites, fuel facilities, terminals, depots and other industrial applications, allowing us to provide reliable, fit-for-purpose solutions.

PAMS has maintained a strong reputation for reliability and service over many years, supported by an experienced team, established supplier relationships and the ability to source specialist equipment both locally and internationally. Our continued supply to major WA organisations demonstrates our capacity to consistently meet demanding industry requirements and project schedules.
