

CORE COMPETENCIES

Petroleum, Aviation & Mining Supplies (PAMS)

is an Australian-owned specialist supplier of fluid transfer, handling, storage and control solutions, supporting the petroleum, mining, aviation, oil & gas, agricultural, industrial and clean-energy sectors.

Our core competencies include the supply and integration of equipment for fluid transfer and dispensing, fuel and liquid loading systems, pumps, valves, hoses, hose reels, metering equipment, filtration, tank gauging, flexible piping, fittings, nozzles, vents, tanks, terminal and depot equipment, rail equipment and spill containment solutions.

PAMS provides customers with more than individual products, working in partnership to identify application requirements and deliver practical, fit-for-purpose solutions. Our technical industry knowledge enables us to support projects from **product selection and sourcing** through to **complete transfer and handling solutions**, with access to an extensive range of locally and internationally sourced equipment.

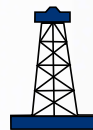

KEY CAPABILITIES

- ✓ Fluid transfer, dispensing and management systems
- ✓ Petroleum, fuel and chemical handling equipment
- ✓ Tanker, terminal and depot loading/unloading equipment
- ✓ Aviation fuelling and fluid handling solutions
- ✓ Mining and industrial fluid transfer solutions
- ✓ Pumps, hoses, reels, fittings and associated equipment
- ✓ Metering, tank gauging and level management equipment
- ✓ Filtration, strainers and fluid management systems
- ✓ Flexible piping, expansion joints and swivel joints
- ✓ Spill containment and environmental protection equipment
- ✓ Rail loading and fluid transfer equipment
- ✓ Equipment sourcing, product selection and technical support
- ✓ Supply of specialist and hard-to-source equipment through established local and international supplier networks
